# Simplifying business and realising value from proposed combination of Keppel O&M & Sembcorp Marine and resolution of legacy rigs

## Current structure

## Post-transaction structure

- KOM (excluding KOM's legacy rigs & associated receivables and certain Out-of-Scope assets e.g. Floatel and Dyna-Mac) will combine with SCM
- KCL will receive 56% stake in Combined Entity and S\$0.5b in cash. KCL will distribute in-specie 46% stake in Combined Entity to KCL's shareholders ("DIS")
- KOM's legacy rigs and associated receivables will be sold to a new and separate entity ("Asset Co"), which will be 90%-owned by external investors

# Realisable value and financial impact

<sup>1</sup> The sum of S\$4.87 billion, which is represented as the value attributable to 56% equity interest in the Combined Entity ("Pro Forma Value"), is computed based on (1) the assumption that 39,949,762,557 shares will be issued by Combined Entity to Keppel representing 56% of the issued and paid-up share capital of the Combined Entity, (2) the Sembcorp Marine shareholders being issued with, in aggregate, 44% of the issued and paid-up share capital of the Combined Entity, which for the purpose of the computation, is assumed to be the same number of shares, being 31,389,099,152 as held by Sembcorp Marine shareholders as at 26 April 2022 (the "Last Market Day"), being the last trading day immediately prior to the date of the Joint Announcement and the Keppel Announcement (as defined in Slide 16 of this presentation); and (3) S\$0.122, being the volume weighted average price ("VWAP") of Sembcorp Marine shares for the last 10 trading days up to and including the Last Market Day. <sup>2</sup> For the purpose of the pro forma ("PF") financial effects, PF EPS assumes the proposed transactions are completed on 1 January 2021 while PF NTA and net gearing assume the proposed transactions and proposed DIS are completed on 31 December 2021. The PF EPS (including disposal gain) is computed based on PF net profit of approximately S\$5.1 billion. <sup>3</sup> For the purpose of the PF financial effects, the net disposal gain arising from the proposed transactions and the value of the proposed DIS are based on the Pro Forma Value. In this regard, the actual net disposal gain and the value of the DIS on completion of the proposed transactions and proposed DIS will depend on the last traded price of the shares of Combined Entity on the first market day immediately following the date of such completion and the actual number of Combined Entity Shares to be issued on such completion which may not be the same as that used in this presentation of PF financial effects.
